

The numbers behind

PORNOGRAPHY

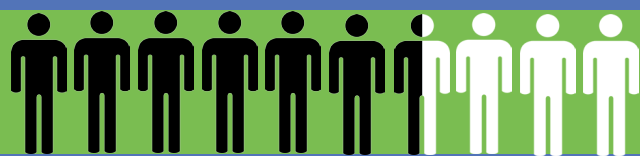

The average age of first internet exposure is 11 years old.¹

9 out of 10 children ages 8 to 16 that have viewed pornography on the internet, mostly unintentional.²

Largest Consumer of internet pornography are kids ages 12-17.³

72% of men visit pornographic sites.⁴

28% those admitting to sexual addiction are women.⁵

47% of Christian families said pornography is a problem in their home.⁶

The internet was a significant factor in 2 out of 3 divorces.⁷

89% of youth admit to receiving sexual solicitation in electronic communications.⁸

⁹As little as 6 hours of exposure to soft-core porn (soft core porn is anything designed to arouse one sexually) is enough to:

- ↓ Destroy satisfaction with his or her spouse
- ↓ Decrease value of faithfulness
- ↓ Decrease in partner satisfaction
- ↑ Increase in the thought that women enjoy rape
- ↓ Lose ability to be with one person and cherish that one person
